At Estudio Santamaría Abogados Law Firm, we have over 30 years of experience practicing law in various areas, including **International Tax Planning, Private Corporate Law, Real Estate Law, Insurance Law, Trust Funds and Fideicomisos**, and, in recent years, **Web3-related Law**.

We are a professional services organization **dedicated to developing Software apps and platforms**. We aim for high-quality solutions, working with an extremely capable team of professionals with the necessary technical expertise, always committed to providing services and being a helpful advisor to turn your idea into a reality.

Our main goal is to keep a competitive team, always eager to learn and evaluate new technologies and have the tools ready to help your needs.

We anticipate the use of new technologies, provide legal consulting and corporate finance services applied to software development ecosystems to design and build feasible end-to-end solutions to streamline the digital transformation of your company.

LegalFin Team

- # **LegalFinTech Consultancy:** Made up of a team of boutique multidisciplinary professionals that help on the analysis, evaluation and viability of Web3, AI and Metaverse Projects.
- # Crypto Legal Consultancy, Assessment and Legal Structuring/design for Web3 Projects/Businesses (including DAO incorporation/legal wrapping). / ADAs *Analysis, Design and Assessment Services in Web3.
- # **Service 360°:** Legal structuring and compliance, financial improvements and business model assessment.
- # Assessment on the feasibility and profitability of crypto/web3 related business models.
- # **Legal structuring and design:** We evaluate the potential and most convenient legal structure for the business model and provide a legal opinion on best structures and risks. We also design the structures for coherent mapping.
- # Assessment and design of the most convenient technology for the evaluated project.

Q-Hausse is a blockchain-leveraged real estate investment platform.

Investors have access to many real estate assets and can explore different alternatives.

Blockchain technology allows them to carry out transactions safely, quickly and at low investment tickets.

The first polo horse-backed token & its tokenized ecosystem.

This platform allows investors to participate in the polo horses breeding industry, acquiring stakes in the early stages of breeding the animal.

A GToken represents rights to the future sale of a polo horse, which takes place at the end of its breeding and training process.

< Fan Access Network

Watch the video

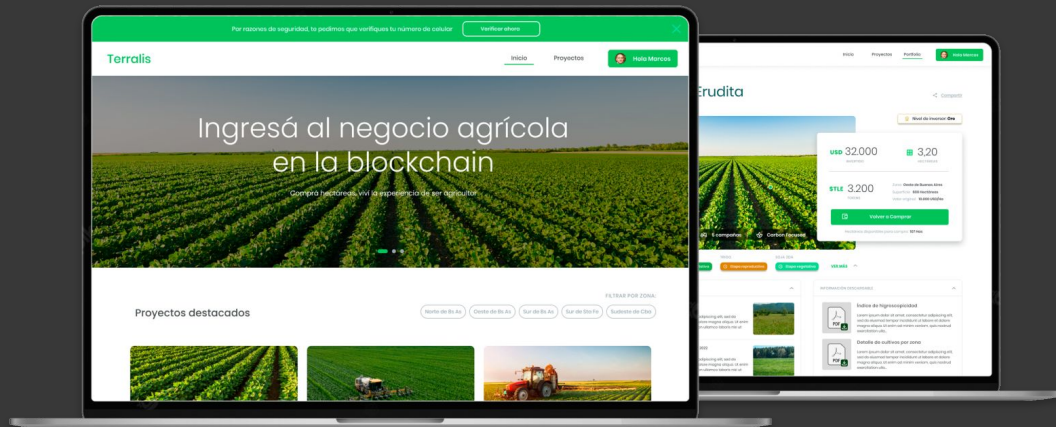

FAN is a web3 concept that allows artists to offer content directly to their community avoiding partisan algorithms.

Web3 FAN allows creators to offer unique products and experiences to their community of fans in an easy, transparent and safe way for both parties.

In this way, artists can be directly linked to their community, eliminating the intermediation of other interest groups.

Terralis is a Investment agribusiness platform

Thanks to the use of cryptographic tokens, distributed registries and different contracts, Terralis eliminates the typical entry barriers to this industry, providing low investment amounts, easy transactionality and security.

This way, investors can acquire shares in soybean production, wheat or any agricultural business.

Tokenized Carbon Offsetting Platform

Pilot link in Córdoba

Carbon Offsetting Marketplace

Tokenization of carbon credits

As strategic partners of the Lacchain distributed ledger public network, directed by BIDLab, through our node, we developed the tokenization of a platform that allows the exchange of Displaced Carbon Certificates (CCDs), linking suppliers and applicants.

It is the first platform in Latin America promoted by the public sector (Ministry of Public Services of the Province of Córdoba), which aims to offset the CO2 emissions produced by contractor companies in the Province of Córdoba

Ready to move forward

It is a crowdfunding platform that allows listing potential brand franchise projects that need financing.

In the platform, you can present photos of the future building, a description of the idea and the project's geographical location. You can also state the amount intended to be collected.

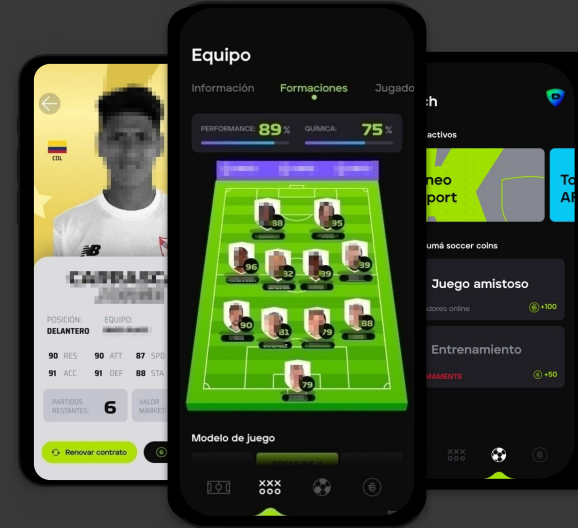

Based on this, investors choose the amount to invest and the method of return. With this information, the platform generates the mutual agreement to be signed by both parties and accompanies the payment processes.

Ready to move forward

Ksport Fantasy allows you to put yourself in the shoes of a soccer manager. The platform has its own currency, with which you can acquire (in trading card mode) players, tactics, and game styles and unlock new features. The performance of the athlete's last real-life matches will influence the footballers' performance in Fantasy. In addition, users can test their skills in different game modes.

Providers Edu Platform

The platform enables all providers of educational institutions to carry out all contracting processes, in an agile, transparent and secure way, requiring the use of only one single tool.

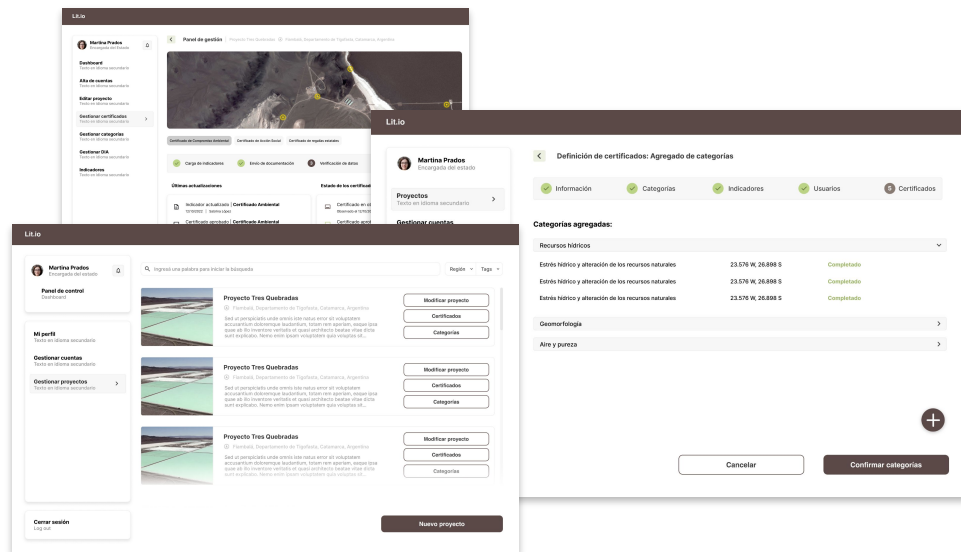

The collaborators of each organization fulfill their specific roles through the use of the platform, thus streamlining the processes and facilitating information traceability.

This application has an information transfer module between the portal and the other management systems implemented by the Institutions.
